## ASSOUR 22 CONFORT

---

### DEFINITION

Thin sound deadening underlay under floating concrete screeds, with incorporated adhesive selvedge.

It reduces the impact noise transmission through the concrete deck.

### COMPOSITION

Glass fibre matt bituminous surface and plastic film facing.  
An integrated adhesive strip ensures side-lap connection.  
Head lap connection is secured with adhesive tape.

- Weight/m<sup>2</sup> : 454 g
- Surface : plastic film with self adhesive selvedge
- Sous-face : glass fiber matt 300g/m<sup>2</sup>

### PRESENTATION

- Thickness : 3 mm ± 0,5 mm
- Length : 20 m ± 0,2m
- Width : 1 m ± 0,01m
- Weight of a roll : 9 kg ± 5%

### APPLICATION

Assour 22 Confort is applied in accordance with French Technical norm DTU 26.2, 52.1 and NF P 61-203.

The impact noise reduction index performance is:

$$\Delta L_w = 22 \text{ dB}$$

This product is classified

**SC1 a<sub>2</sub> A Ch / SC1 b<sub>2</sub> A Ch**

### SECURITY

It is not classified as dangerous according to the international regulation.
