

BASASPHALTE SI

DEFINITION

Bituminous membrane for roof waterproofing.

SCOPE OF APPLICATION

Underlayer of a combined waterproofing system (combined with mastic asphalt).

Applied upon : non accessible flat roofs / technical flat roofs / pedestrian terrace / vehicle access terrace.

Applied by : self-adhesivity.

DESCRIPTION

Surface	Sanded
Compound	SBS elastomeric bitumen
Reinforcement	Glass mat
Under face	Peelable film

DIMENSIONAL CHARACTERISTICS

	Nominal value	Critical value
Length (m)	10	9.90
Width (m)	1	0.99
Weight / m ² (kg)	3.7	3.4
Weight of a roll (kg)	37.1	34.1
Thickness (mm)	2.7	2.6

PERFORMANCES

	Norm	Unit	Nominal values	Critical values
Tensile strength	EN 12311-1	N/5cm	700 x 350	600 x 300
Shear tearing of joints	EN 12317-1	N/5cm		350 x 650
Elongation	EN 1231-1	%	2.5 x 2.5	2 x 2
Cold bending resistance	EN 1109	°C	-20	-15
Heat flow resistance	EN 1110	°C	100	100
