Quadro by Icopal

A stylish choice for life...

Aesthetic

Lightweight steel

Easy to install

Low maintenance

30 years guarantee

At Icopal we think that a roof should be functional: It should protect you against all types of weather, it has to be easy to install and light weight, so it can be placed on any type of pitched roof. But, we also think that an attractive roof adds value to a house or property. With this in mind, we developed a new tile that meets all these criteria: the new Quadro by Icopal.

The new Quadro by Icopal has a modern appearance. It still only has one-seventh of the weight of a concrete tile. It is ideal for all applications and locations, whether new build or refurbishment, residential or commercial, urban or rural.

Of course, Quadro by Icopal comes with a package of comprehensive accessories.

Technical information

Size of tile – overall (w x h)	1293mm x 419mm
Size of tile – cover (w x h)	1250mm x 399mm

Steel (composition)	0,75mm Zn 275 gr/m ²
Weight	3,6kg per element (7,2kg per m ²)

Acoustic version available!
Contact us for more information

Quadro by Icopal features a steel core which increases strength while reducing weight.

Quadro by Icopal tiles are easy and fast to install, thanks to the low weight (7,2 kg/m²) and the clever fixation.

Quadro by Icopal offers weather protection from rainfall, hail, snow, ice and sun. And the tiles are storm proof.

Quadro by Icopal tiles are very durable. Maintenance costs are minimal during the lifetime.

When correctly installed, Quadro by Icopal carries a 30 year guarantee

Quadro by Icopal can be used on roofs with pitches as low as 15°.

Quadro by Icopal is well fit for new build projects. But it can be installed directly over existing roofs as well.
